 luc.micallef@gmail.com

 **Santa Cruz, California**

Education

M.Sc. Software Engineering

University of Hertfordshire, UK
2011 - 2014

Postgraduate Certificate in Vocational Education & Training

MCAST, Malta, Europe
2009 - 2011

B.Sc. Business & Computing

University of Malta, Malta, Europe
2004 - 2007

Technical Skills

Languages: Python, C#

Backend & APIs: FastAPI, Flask, REST APIs

Cloud Services: Google Gemini AI

Database: SQL

Tools & DevOps: Docker, GitHub, CI/CD

Hardware & Embedded: Raspberry Pi, Sensors, GPIO

Web & Learning Platforms: HTML5, CSS3, JavaScript, Bootstrap, WordPress, Moodle

Certifications

Snowflake: Data Warehousing Workshop
Credential ID: 171980101 | 2026

IBM - Gen AI and LLMs
Credential ID: JNQ3URWSOQFW | 2025

Microsoft Certified Solutions Developer
Credential ID: 6220091 | 2014

LUCIENNE MICALLEF

Software Engineer | EdTech

 **Eligible to work in the U.S. without sponsorship**

Summary

Software engineer with experience in Python and C#, primarily in educational and research environments. Strong background in teaching and mentoring programming alongside hands-on development of backend services, data-processing scripts, and learning-focused applications. Interested in remote roles in EdTech and Software Engineering.

Work Experience

Career Break

2023 - 2025

Relocation & Immigration Process

- Focused on parental responsibilities while awaiting immigration documents.
- Actively pursuing online courses to enhance skills in DevOps (Docker, Kubernetes), AI/ML (TensorFlow, PyTorch, NLP) and cloud services

Software Instructor

2009 - 2019, 2021 - 2023

Malta College of Arts, Science & Tech, Malta

- Designed and delivered 20+ hands-on STEM programming labs for 80+ students annually, teaching Python, C#, and software engineering principles.
- Developed reusable curriculum frameworks and 30+ automated problem sets aligned with real-world engineering workflows, reducing grading time by approximately 40%.
- Coached and mentored students in debugging, testing, and code review practices, resulting in higher-quality projects and a ~25% increase in successful project completion rates.
- Collaborated with academic colleagues to integrate modern development tools (Git, virtual environments, IDEs) into coursework
- Supervised 15+ undergraduate STEM theses, guiding students in research, technical documentation, algorithm design, and effective use of LLM tools for literature review and rapid prototyping.
- Led robotics teams to international competitions, enhancing student engagement and technical skills - [First Global](#)

Python Software Engineer

GEOMAR, Kiel, Germany

2019 - 2021

- Developed Python-based data-processing pipelines to transform and validate XML datasets for large-scale physical oceanography models as part of the [Immerse-Nemo Project](#)
- Integrated Python and Bash workflows used by distributed research teams across EU institutions
- Participated in peer code reviews and applied best practices for maintainability, documentation, and collaboration

Workshops and Training

Build with AI - Google - SunnyVale, CA (2025)
Technical Writing (Dec 2025)
