🐙 [LucienneMic](#)

An experienced **Software Engineer** and **Lecturer** with **over 10 years** of expertise in delivering efficient solutions in **Python and C#**.
Passionate about bridging technology and education.

📍 Santa Cruz, California

Education

M.Sc. Software Engineering

University of Hertfordshire, UK
2011 - 2014

Postgraduate Certificate in Vocational Education & Training

MCAST, Malta, Europe
2009 - 2011

B.Sc. Business & Computing

University of Malta, Malta, Europe
2004 - 2007

Technical Skills

Programming Languages: Python, C#, JavaScript, HTML, CSS

Frameworks & Libraries: FastAPI, Flask

Data Engineering: pandas, numpy

Cloud Services: Google Gemini AI

Database Technologies: SQL

Tools & DevOps: Docker, GitHub, CI/CD.

Workshops & Training

Build with AI - Google - SunnyVale, CA (2025)

Participated in a workshop on generative AI applications, prompt engineering, and applied large language models.

Experience

Career Break

2023 - Current

Relocation & Immigration Process

- Focused on parental responsibilities while awaiting immigration documents.
- Actively pursuing online courses to enhance skills in DevOps (Docker, Kubernetes, CI/CD) and AI/ML (TensorFlow, PyTorch, NLP)

Senior Lecturer - Software Development

2009 - 2019

Malta College of Arts, Science & Tech, Malta

2021 - 2023

- Taught software units using Raspberry Pi, Python, C#, Web development and SQL to undergraduate students.
- Developed engaging course material, schemes of work, tutorials and project work to enhance student skills.
- Led daily lab workshops through hands-on coding tasks and projects.
- Mentored students to submit a highly technical thesis
- Led robotics teams to international competitions, enhancing student engagement and technical skills - [First Global](#)

Python Software Engineer

2019 - 2021

GEOMAR, Kiel, Germany

- Developed and implemented Python scripts to convert XML datasets and bash scripts for physical oceanography models as part of the [Immerse-Nemo Project](#)
- Participated in code reviews, providing constructive feedback and applying the best practices.
- Collaborated with scientists, engineers and oceanographers across EU institutions to improve ocean circulation models.

Software Developer

2007 - 2008

MITA, Malta

- Involved in the testing phase of the e-ID project for the Government of Malta
- Reported issues to suppliers and ensure they deliver the fixes in a stipulated time.
- Delivered training courses to the Service Providers, and demonstrated the eID system internally.

Certifications

🏆 Microsoft Certified Solutions Developer (MCSD)

Credential ID: 6220091 | October 2014

MCSD 70-483 – Programming in C#

MCSD 70-484 – Essentials of Windows Store Apps using C#

MCSD 70-485 – Advanced Windows Store App Development using C#
